

Join our team!

Leading Oregon to a safe, clean, and sustainable energy future.

At the Oregon Department of Energy, we're helping to shape the state's energy future.

*Our team is dedicated to keeping Oregon on the **leading edge of renewable energy and efficiency** while supporting energy innovation, investment, and resilience. From helping individual Oregonians save energy at home to overseeing the state's interests in the world's largest environmental cleanup at the Hanford nuclear site, **our work is challenging, rewarding, and diverse**. Oregon is one of the most energy efficient states in the country, routinely landing near the top of annual national rankings. ODOE is committed to helping Oregon remain an energy leader, and that starts with hiring smart, engaged team members who are **ready to deliver for Oregonians**.*

Senior Energy Policy Analyst

Oregon is a leader in clean, renewable energy technologies and policies. From being the first state to approve rules to reduce carbon dioxide emissions to adopting a 50 percent renewable portfolio standard goal, Oregon is making progress on some of the planet's most important energy issues. We're recruiting for expertise in electricity systems, planning, and current policy discussions and development.

We're looking for a results-driven team member who will:

- Serve as the state's expert on resource planning for large-scale electricity systems, generation, transmission, and distribution, including storage and smart grid applications.
- Serve as the state's expert on renewable energy technologies including integration and reliability.
- Help Oregon achieve its greenhouse gas reduction commitments and renewable portfolio standard goals by participating in utility integrated resource planning discussions, attending advisory committee meetings and participating in planning development with the Northwest Power and Conservation Council, and engaging in relevant proceedings at the Oregon Public Utility Commission.
- Provide analysis and make recommendations on electricity resource planning and system development policy discussions.
