# **Offshore Wind Virtual Tour for NASEO Manufacturing, Installation + Jobs & Employment**

**Thursday October 22, 2020 11:00 am to 1:00 pm (Eastern)**

This event is divided into two halves. In the first, we present an overview of the major manufacturing processes: foundations/towers, blades and nacelles before looking at the subsequent processes to get them all installed. The second half then dives into jobs looking at the employment which is created by offshore wind, the experience from certain regions during the transition process and the training requirements that will be needed to prepare the future labor force.

As with previous and future events: Our aim is to be brief, light on data and heavy on graphics and videos – thereby providing attendees with a comprehensive visual overview: hence Virtual Tour!

## **Manufacturing and Installation**

11:00 EDT / 17:00 CET	Welcome and introduction. <b>David Terry</b> , <i>Executive Director, <u>National Association of State Energy Officials</u></i> <b>Cassie Powers</b> , <i>Managing Director – Programs, <u>National Association of State Energy Officials</u></i>
